The SoundDock digital music system was specifically designed to expand and enhance your enjoyment of the music stored on your iPod or iPod mini. Just slip it into the docking cradle for the BOSE sound your favorite songs deserve.

The iPod charges as it plays, so you enjoy music without interruption. Its sleek, slender design fits almost any rooms decor. And the included remote lets you control the SoundDock system from across the room. The SoundDock system is designed to play your favorite tracks with crisp clarity, allowing you to discover subtleties in your music that used to simmer beneath the surface. A host of proprietary technologies add vitality and realism to your tracks. As a result, the music seems to come from a surprisingly wide soundstage. And an optimized port design delivers a full, rich sound thats greater than youd expect from a system this small. The SoundDock system is easy to operate. Just plug it in, pop in your iPod and play. Your iPod works as long as it has a dock connector on the bottom. There are no extra wires or adapters. The included remote allows you to control your music at the push of a button. And a stylish, sophisticated look means it can blend in or be the center of attention wherever you place it.Simply dock and play to fill the room with vibrant, detailed sound that will revolutionize the way you experience your iPod. DaMann 3.0 out of 5 stars It doesn't get any better. This SoundDock could fill a room with clear notes across the spectrum while charging my iPod at the same time. The only issue I ever had with this product was the one that caused it to break in the end. The docking pins were too fragile and subject to bending and it was a challenge to line up my iPod properly. I'm not sure if there was any way to improve the design considering the iPod's charging design, but this was a big issue for me and the reason my SoundDock sat broken and unused for so many years before we finally got rid of it. For the money, it didn't last nearly long enough. Just get a bluetooth adapter and save some cash. I ordered a used one that was described as in "acceptable" condition. Well I couldn't find a flaw and everything worked. The only problem with these is that the connection can be a bit temperamental when you first connect the iPod to the dock. Just make sure it is secure and wait about 10 15 seconds.

I worried that since it is a used product that the dock would be worn. So to avoid wearing it out I bought the CoolStream Duo bluetooth adapted and just leave it on. Now I control my iPod from where I am sitting. Being such a small speaker you are not going to get house shaking bass but you do get a very even and clear sound at a decent volume. Recommended. I needed some speakers to use with my iPod. Browsing Amazon I came across this product. It is great. The sound is good, the loudness is right for the room I work in and at least the iPod can be charged as well. The age of the iPod means that the battery is not lasting as long as it used to. So having this Bose system works well to keep the longevity of this gadget alive. It was more money on speakers than I would have initially paid out for but, the brand, and the system itself was worth it. And of course being gentle with the system when using it is also essential. Especially the pin for the connection. It was packaged well, I didnt have to wait too long for it to be delivered, and all round I am happy with the purchase. I got it for my husband because he loves music and he uses it everyday after I leave for work. The Bose is still booming when I get home. The sound is incredible and gives a wonderful feeling. Best thing I could of ordered. I am very happy I got the Bose SoundDock. The sound quality of this one is 100x better than my other more expensive docking station. Should always go with the Bose from the beginning, IMO I tolerated the power cord getting hot. Many times I had to completely disconnect the power cord from the device and the outlet to get it to work. It finally stopped working altogether this week. Honestly I cant believe how tinny and weak the vast majority of these systems are. In the sub At the original price I thought this was pretty overpriced even though the sound was nice.

At the new price it is much easier to swallow although I really wish theyd drop the original one and just sell the Portable version at the price of the one above. Sound quality is nice and warm with good bass and smooth midrange. The highs are a bit lacking with some material but overall it is a very nice. The Sounddock really does a nice job of filling the room with sound. I dont own any other Bose product because I think they cost too much for what you get, but in this case with the new price drop this isnt a bad deal. Most nonaudiophiles will find the sound very pleasing. Again if your considering a cheaper model try and save up for this one, youll be happy you did. So I basically Bought and never was able to use it. Glad I found one as they stopped selling the sound dock in 2017 Sorry, we failed to record your vote. Packaging Standard Packaging The SoundDock Series III system offers a unique combination of small size and proven performance. It includes a remote that controls the system and basic functions of the iPod or iPhone. It even allows you to switch back and forth between playlists. The system also includes an auxiliary input that lets you easily connect other audio devices, such as another MP3 player. Simple to use, it offers dockandplay capability and also charges your iPod or iPhone while it's docked. Experience it for yourself. Color Black. Audiophile use, and Casual Listening use are two entirely different things and most Bose stuff is designed for the latter. For casual listening, I generally want the music to FEEL loud and full, but I still want to hear stuff going on around me. I want to be able to hold a conversation without having to turn down the music. Bose accomplishes this with an uneven EQ curve. The sizzle is hyped, the mids are DIPPED reduce clutter in the range of human voices, and the bass is hyped beyond all belief for such small speakers, by using resonances that make it a little vague about the pitch information. For background music when I have a few friends over this is exactly what I want, and this thing sounds truly amazing. The music is crisp and full and it gets surprisingly loud without sounding awful. But when I put on my audiophile hat, I shut the darn thing off because it was not intended for that. And that is OK! My audiophile gear RULES for when I am sitting alone losing myself in the music, and I can run my instruments through it and have them sound great. But it fills up the entire audio spectrum and if anyone wants to talk to me I have to turn it down to half the level of the Bose. Think about what you WANT, and if what you want is casual listening use, then I think that this is a remarkably great choice. I looked again and it clearly said remote in the box. The unit does not have a radio, which is not a deal breaker. The sound quality is Great and it seems to work well, I just cant control it without the remote. Dont buy from these guys as they seem to be foreign and not very upstanding or honest. I know most people listen to music on their phones, but I am still using ipod, and the Bose dock had such great sound.

I was very glad, but somewhat leery, to find that I could order one from Amazon, through a 2nd party, but it was a used one. I held my breath, and placed the order. It arrived in even shorter time than we thought, and it is WONDERFUL!!! It sounds brand new. I dont remember who the seller was, but they really came through, and I highly recommend them. I was able to buy this great used system and, although its a little different from my original, I figured it out and am so happy. I love my music. It takes me out of this world and makes me enjoy my life. Thank you so much for taking care of this product so that I can enjoy it. And I wouldnt be able to afford a new Bose. This is absolutely wonderful. The appearance is good, the remote was sealed in plastic and works great, and the sound is phenomenal. I never knew what I was missing in speakers before, and I couldnt be more pleased. One of the biggest annoyances was how incredibly sensitive the audio connection was and how poorly it would affect the sound if you barely wiggled the cable. Those of us who used it would have to wiggle the cable around to just the right position for the sound to play, and if you touched it after that, it would go out again. I had the exact same issue with a brand new cable, so I know its not a bad cable issue. Last week and today no matter how much I wiggled the cable every which way, I could not get it to play any sound. RIP speaker. Ugh. I no longer have a stereo or other audio device and use this with my iPod and iPhone for all my audio needs and charging of said devices. Great sound quality compared to similar systems. I use it all the time. The sound quality of the Series III seems even better than the series II, the detail is more precise, the sound seems even more real. Other improvement is the ac adapter, which seems better made and the connectors fit together better. You either need to use the sound buttons on the iPhone or the remote.

My remotes for my previous models havent lasted well, so I was a bit disappointed with this,

although it makes the model look a little sleeker. I now have one upstairs and one downstairs in my house and am happy. I use an adaptor with my Series II so that I can use either my old iPod with it without the convertor adaptor or my new iPhones with the adaptor. You can get a similar adaptor for this to be able to use older models on it, but haven't tried it yet. Without doubt the best player I have ever owned. Late delivery almost certainly due to our present health problems, but the seller did their utmost to keep me informed of how things were going. Definitely worth 5 stars, I only wish I could award more. Sorry, we failed to record your vote. Please try again Great seller thank you! Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again It is Dom g fine. Sorry, we failed to record your vote. Please try again Lovely quality sound. A new lease of life for my iPod classic. Hurrah! Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again It was good to have the colour choice also, although my daughter is now determined to have this now that I've moved to a Samsung phone and can no longer use this as a charging station. I can still use the dock with an additional cable, but as the SoundDock only has an lightning connector I can no longer use it to charge my device. Sorry, we failed to record your vote.

Please try again In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. The main differences between this model and the first edition is the remotes layout and color. Product features include rechargeable lithiumion battery, rotating docking system, remote, portable, built in carrying handle, and Bose quality speaker. You might not need every tool for every procedure. With no major known failures or manufacturer recalls, the Portable v2 is noted to be a very reliable speaker. This device has a 30pin connection used for an iPhone 4s or older. The Portable v2 model has a rotating docking station. If you push on the edge of the docking port then it should rotate out. This device can run off of DC power from your home as well, so do not be alarmed and think this is not your model just because it has a power cord. I find the sound from them to be good at first impression, but over time and not that long a time, the sound becomes irritating. Not so with this little gem. I have this in my bathroom playing lots of tunes on my iPod. I've had it for over a year now, and I'll still be amazed by how smooth the bass is. My original SoundDock was hit by lightning and fried, so I immediately got online to buy a replacement. Top of speaker was Got what I paid for. Thanks for the great Sound dock. Verisign. Basszus vegfoka 23mp mulva megfut vagy pozitivba vagy negativba ha nincs a hangszoro rarakva, hangszoroval azonnal letilt, amikor a kimeneten eljut DC 4Vig a vedelem lekapcsolja relevel az erositot.

Mikor a MUTE hibát kerestem, volt olyan eset is, hogy nem futott meg a kimenet és szűlt a basszus rendesen, de újból bekapcsolaskor ha nem halkítottam le a potit akkor kikapcsolt a rele, ha halkítottam akkor jó lett, de nagyon susogott, arra hasonlított mint amikor FM radio nincs az allomason, van egy közös mute tranzisztor az kapcsolja az összes többi, ha azt kizavartam akkor is megmaradt a susogás, szerintem visszafelé jött valamelyik oldalról ezért szedtem ki mindegyik oldalról a tranzisztorokat, nem akartam bajlódni vele, hogy honnan jön a susogás vissza. Mi lehet a gond Bose Sounddock 1 tapegyűjlesztő csatlakoztatás. Egy barátom megkért, hogy találjak vagy gyártassak egy tapegyűjlesztőt a Bose dokkolójához. Sajnos az eredetiket aranyban adják, így gyártanom kell egyet. Találtam is egy elegáns kis 4 pines csatlakoztatást, de fennakadtam az eredeti csatlakoztatás labkiosztásán. Találtam egy rajzot de nem tudom eldönteni, hogy a kábelen levő ábrázolja, vagy a dokkolóban levő. Ha valakinek dolga volt ilyennel, és tudna segíteni, kérem ne tartsa vissza magát. Köszönöm.. BOSE bekötési rajz Legyszerű legyszerű ha valaki tudna segíteni egy BOSE AMP2440-as erősítő bekötésében, azt nagyon szépen megköszönöm. Ez AUDI A3-asból van, a steker nincs meg. Bose Lifestyle CD20 FLC jelző halvány Szűjlesztők! A fenti készüléknek halvány a jelzése. Eleg érdekesen van megoldva a jelző tápfesz, sokban függ a bejövő 12VAC feszültségtől. Kérdésem az lenne, hogy a fűtést próbáljam emelni, vagy a 24Vot. A D8-on a 30V is kevesebb, de az AC 4.5V is. Melyik befolyásolja jobban a fűtést. A fűtést, vagy a negatív tápfesz UdV Jacint Similar manuals You can write in English language into the forum not only in Hungarian.
