GT8 Guitar Effects Processor. Reload to refresh your session. Reload to refresh your session. Vnější schránka procesoru AD8 tvoří plechová krabice nastříkáná hnedou metalizací. BODY otočný potenciometr s aretací ve střední poloze, která je polohou základní.

Cím více otáčím doprava, tím více se nám virtuálně zvětší korpus nástroje a tomu odpovídá i výsledný zvuk zde může dojít ke zkreslení, je-li nezádný, eliminujeme jej snížením celkové výstupní úrovně hlasitosti. Následuje indikátor POWER, který svítí, je-li zařízení pod proudem v případě užití baterii indikuje jejich stav. Hlavním testovacím nástrojem byl obligátně Furch Blueshand s aktivní el. Fishman Prefix Plus, zapojeno do komba BEHRINGER ULTRACOUSTIC ACX1000, Laney EA 120 a přímo do PA. Doporučuji prostudovat manuál. Použijeme základní nastavení ovladače na nuly nebo v prostředku a nejdříve naladíme pomocí vestavěné ladící. Ladíku lze tedy užít i pro nestandardní ladení. Ladíčka je z továrny klasicky nastavena na 440 Hz, pokud nám toto nevyhovuje, máme možnost pomocí tlačítka PITCH zvolit nastavení od 438 Hz do 445 Hz. Po naladění se venujeme ekvalizeru. Předpokládám, že tento procesor si poradí muzikant, který chce pracovat se zvuky více méně akustickými, a tady jich lze najít opravdu hodně. Další práci se zvukem umožňuje vestavený reverb. Vyrobcem se rozhodl pro modelování opravdu dobrých a časem proverených nástrojů. Bohužel tyto skvosty asi jako většina českých muzikantů nevládnou, možnost přímého srovnání tedy odpadá. Rekl bych, že zvuky 1-4 skutečně znejí jako Martinky a Gibsonky, Guild 5 si netroufám porovnávat. Simulovat klasiku je asi nejobtížnější sestka Jose Ramirez mi připadá ochuzená o uslechtilé tóny starých mistrovských nástrojů. U mě jednoznačně vyhrává Gibson B 25, v těsném závěsu je Martin 000 28. Potenciometr BODY je dalším ovladačem sekce ACOUSTIC MODELING, jeho citlivým!!! užítím lze dosáhnout zhuštění zvuku, dobrý nápad, přidává další rozměr. Naopak STRING ENHANCE mě přilis nenadchnul, výsledný zvuk při jeho užití se mi zdá příliš plochý. Jelikož jsou možnosti nastavení všech ovladačů velmi široké, podíváme se, jak na to šel výrobce a zhodnotíme tovární nastavení.

Da se říci, že nastavení odpovídá uvedenému charakteru hry a je jen na uživateli, zda je v paměti ponechá nezmeněné, necha se výrobcem inspirovat a drobně je pozmení, či si vytvoří nastavení vlastní, zcela originální uložení se provádí tlačítky WRITE a SELECT. Bezchybně pracuje eliminace zpětné vazby, která automaticky orizně nezádný frekvence, naučit se ovládat dva nožní prepínací najednou je jen otázkou zvyku. Pro klasiku s nylonovými strunami se efekt nehodí, pokud nechcete experimentovat, elektrické kytare ani lučovce zvuk AD 8 take nesluší co se týká zvuku, které pokládáme za klasické. Me stáčil připojit volume pedal škoda, že ho výrobce k efektu nepřihodil a byl jsem zcela spokojený, a to jak s výsledným zvukem, tak i s nahráváním postaru do tape decku i do PC, nebal bych se AD 8 použít ve studiu. Možnost strídání až šesti různých zvuků v režimu BYPASS považují u akustické kytary za dostatečnou. Please try again. Please try again. Body and String Enhance controls simulate warm, miked acoustic sounds. Includes high quality reverb tailored for acoustics, 4band EQ, antifeedback, a chromatic tuner with mute, and quick pedal based operation. Four preset memory locations switch sounds instantly. Balanced XLR outputs allow direct connection to PA systems. The Boss AD8 Acoustic Guitar Effects Pedal uses COSM modeling technology to transform the piezo pickup sound of an ordinary acoustic into the tones taken from six high end acoustic guitars. It also simulates the warm sound created by miking the guitars neck and body a worlds first. Body and String Enhance controls simulate warm, miked acoustic sounds.

Includes high quality reverb tailored for acoustic guitar, 4band EQ, antifeedback circuit, a chromatic tuner with mute, and quick pedal based operation. The Boss AD8 has preset memory locations for

switching acoustic sounds instantly. Balanced XLR outputs allow direct connection to PA systems. See full review Arrowzoom Onsite Associates Program Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. George Leonardi 3.0 out of 5 stars I ended up returning it for a variety of reasons. My experience I mostly play 12string guitars, and occasionally nylon string guitars. With the 12 string, I mostly used body type 1 which simulates a Martin D28. I found that all of the other body types made my tone very dark. I didnt find much value in using the nylon string guitar body body type 6 when I was playing fingerstyle. So at the end of the day, I really was using the AD8 as a very expensive 4 band EQ, which is why I returned it to get another DI box. Probably only if theyre using a low end guitar Too noisy and electric sounding. So many different functions in one pedal. I not only use it for my live solo performances but also in my home studio to shape the tones of my acoustics and to give my electrics a fuller cleaner sound. Sorry, we failed to record your vote. Please try again. This manual should be kept and held at hand. Purchase the Boss AD10 acoustic guitar processor pedal Outofthebox only in manual mode was able to select a very good sound. Ad8 Boss acoustic guitar processor. AD8 has four different patch memories that can be accessed immediately, so you dont have to fiddle with the control elements during your show.

Symmetrical hifi output and a loopthrough output to your audio amplifier let you choose the right style and amount of your own solid and throat sounds. Some years ago I was looking for a foot switch with a preamp and knobs to form my own sounds. The AD8 I looked at together with the Zoom A3 and the Fishman Aura. The Zoom A3 is a great foot pod with many, many choices, but it turned out to be an overwhelming one. In contrast to the zoom, which allows the operator to store more than one preset and can be awkward to get to the AD8, the AD8 has only four operator preset five if you are setting. What does an acoustics musician really need. In my view, the possibilities of creating sounds are all you need. Offering a variety of different functions and specialities, it is intended for the guitarist who wants to have all his special effect and tone handling in one single package. It has inches connectors and is supplied by the included AC adapter. Its not rockable its a guitarsfootpedal. USE The composition of Boss AD8 is fairly simple to follow, but its busy and will take some getting used to what its all about. Regarding parameter settings, the treadle has controls for Ausgangspegel, Reb with three different Hall styles to select from, Korpertyp, Korperpegel, Stritenverstarkung and a section for EQ, which contains controls for bass, two for mid, one for high and one for high. It also has a section for storing sound, which I think is a really nice one. Three large footswitches are also available for this storage function and for switching the effect on and off. This manual is quite well put together and if you have got hold of it I would suggest to have it around as there are many inputs and outputs for this one. Although Im generally not a big fan o f FX on guitar, this treadle is good and I can see how it would definitely work for show. Sounding really good, the reverse is probably the most useful, but the acoustical modelling and EQ section are probably the most useful.

The Boss AD8 provides this option if you want your acoustics guitars to produce a more accurate and unadulterated soundtrack. ALL MEANING I only used the Boss AD8 a few gigs and didnt use it for living shows, but I would definitely suggest trying this treadle if you want to use some effect and tone modelling with your acoustics guitars for living shows or even for home use. However, I wouldnt advise using this for recordings as I always like to pick up guitars cleanly and do what I want with them later in the mixer. For such a foot switch the Boss AD8 is definitely a good value to look at. The Boss AD8 is also very simple to use. It simple to modify the parameters of the preset EQ, effects. Four preset are more than enough for my needs. Excellent workmanship. SONG QUALITY Here the boot is pinching. Audible sim ulator preamp low of 6 is great for guitars Gibson, Gilde, Martin.. very full connection since you can go out XLR or socket and also use in single or double mix

er. If you don't like me, you can dive into the manual for 3 days you put your guitars on it I use it with a petroci with piezoelectric or a 414 EC Taylor, you try 6 presets pots 6 positions, also the reverbs and sound fast. The first one I think is a bit tough because the AD8 boss is much better without it anyway. Often I come to myself to ask myself how I can get this kind of tone with my ElectroPetrukci because they are amazed by the results. Its on, then its better to enjoy a good food and good speaker tone or good acoustical amplifier qualities. I've had 3 years and I think its new award is a little bit uplifting but I don't doubt its build and especially the rendered image that is going to get subsidised credit that will make my tone very persuasive Electro fax. Selling my first Ad8 to carry a pretty much home lr bag, I came back to the Ad8, which is a littleknown item, but performs its function. In addition, a multistage selection knob allows different guitars such as Martin, Gibson etc.

When you have 4 different default settings that have been made in relation to the tone I say, dignified for a model, then I say happy birthday. SONG QUALITY Here the ship should make the most of its offer. All you can ask of such a guitar is to add bass and heat to the tone of our guitar, give our piezoelectric guitar clarification and often crack the too hot music. Another chance to try out his little BOSS AD5 which works great in comparison to the AD8. We see very little discrepancy between without and with AD8 in this case. Tone qualities are very bad and that gave him a bad touch. General view Highquality casing. FXs near zero on the acoustics guitars. Zinslose case does not add anything to the tone of electric. Does the program have any kind of effect. Using COSM modelling technologies, the BOSS AD8 BOSS acoustic acoustic pickup processors transform an acoustic guitars piezoelectric pickup into one of six standard acoustic acoustic instruments, the worlds most soughtafter. AD8 can also emulate the rich, mellow tone produced by recording on the neckline and desk of the instrument. SUNQUALITY Are the results sufficiently efficient, quick to react and real. Transform an everyday guitarsiezo into one of the six best guitars in the game. In what way do you judge the product in terms of quantity and pricing. Multiple effect for acoustical guitars. Honestly, this microphone and the acoustics guitars dont impress me. Makes it sound empty and fake.
